RISK FACTORS

Before deciding to purchase the Bonds, investors should carefully review and consider the following risk factors and the other information contained in this Prospectus. Should one or more of the risks described below materialise, this may have a material adverse effect on the business, prospects, shareholders' equity, assets, financial position and results of operations (Vermögens-, Finanz- und Ertragslage) or general affairs of the Issuer or the Group. Moreover, if any of these risks occur, the market value of the Bonds and the likelihood that the Issuer will be in a position to fulfil its payment obligations under the Bonds may decrease, in which case the holders of the Bonds could lose all or part of their investments. Factors which the Issuer believes may be material for the purpose of assessing the market risks associated with the Bonds are also described below.

The Issuer believes that the factors described below represent the principal risks inherent in investing in the Bonds, but the Issuer may be unable to pay interest, principal or other amounts on or in connection with the Bonds for other unknown reasons than those described below. Additional risks of which the Issuer is not presently aware could also affect the business operations of Hannover Re Group and have a material adverse effect on Hannover Re's business activities and financial condition and results of operations. Prospective investors should read the detailed information set out elsewhere in this Prospectus (including any documents incorporated by reference herein) and reach their own views prior to making any investment decision.

Words and expressions defined in the Terms and Conditions shall have the same meanings in this section.

The following risk factors are organized in categories depending on their respective nature. In each category the most material risk factors, based on the probability of their occurrence and the expected magnitude of their negative impact, are mentioned first.

Potential investors should, among other things, consider the following:

Risks relating to the Issuer and the Hannover Re Group

Underwriting Risks and Other Business-Related Risks

Natural catastrophe risk

Natural catastrophes are partially covered by insurance policies in the property and casualty and life and health (re)insurance written by the Hannover Re Group. Such catastrophic events include, among other things, windstorms and hailstorms, floods, earthquakes, major fires, cold spells or pandemics. Neither catastrophes as such nor the scale of loss and damage caused by such events can be predicted. Even though the Hannover Re Group monitors the aggregate risk tolerance with respect to catastrophic events in each geographical region, catastrophe-related damage and claims can lead to extraordinarily high losses outside this tolerance. Furthermore, the scale of catastrophe losses may increase in the coming years relative to the multi-year average.

A certain proportion of the required risk capital is attributable to risks from natural disasters. For the purpose of assessing Hannover Re Group's material catastrophe risks from natural hazards (especially earthquake, windstorm and flood) Hannover Re Group uses licensed stochastic catastrophe simulation models including latest results from scientific research and enriched with the expertise of own geoscientists from specialist departments. The model's outcome are probability distributions representing the full range of possible loss scenarios from every natural catastrophe worldwide. For the purposes of portfolio optimization and steering the geographical diversification maximum underwriting limits and thresholds are introduced for various extreme loss scenarios and return periods in light of profitability criteria. The monitoring of the risks resulting from natural hazards is rounded out by scenario analyses.

Meteorological extreme events like intense tropical cyclones, windstorms, floods are often seasonal with the highest proportion of annual losses occurring on average in the third quarter, with quarter to quarter comparisons varying very strongly. The ultimate impact of a catastrophic event or multiple catastrophic events on Hannover Re Group's financial condition, results of operations, business and prospects is difficult to predict and will be affected by a number of factors,

including, *inter alia*, the frequency of loss events, the severity of each event, the total amount of insured exposure in the area affected by each event and changes in the value of the insured property. To the extent the Hannover Re Group writes more natural catastrophe covers in the future, a greater impact in absolute terms of natural catastrophe losses on Hannover Re Group's results can be expected.

The possible effects of natural catastrophes are compounded by the correlation between climate change and severe storms, floods and drought as well as adverse agricultural yields. The effects of global warming and climate change cannot be predicted and are likely to aggravate potential loss scenarios, risk modelling and financial performance. Furthermore, climate change could lead to extreme weather events spreading to parts of the world that have not previously experienced extreme weather conditions.

Natural risks of large scale may also occur as pandemic events. In the property & casualty segment this would be relevant for the coverage of event cancellations, business interruption or credit and surety reinsurance.

In case of adverse natural catastrophe events covered under current and future contracts, a negative impact on Hannover Re Group's net income, business and prospects is possible.

Reserving risk Property and Casualty

Hannover Re Group companies systematically cover property and casualty risks underwritten by primary insurers and reinsurers and calculates the amount of technical provisions that are to be established for insured events in accordance with relevant actuarial methods that reflect assumptions and empirical values.

Due to their nature and possible delays in reporting man-made casualty losses, an adverse effect of a man-made casualty loss may not be recognized until some period after the occurrence of the loss. While the level of provisions constituted is regularly adjusted in the context of normal run-off with the aid of the latest information available to management. The adequacy of the provisions initially constituted and subsequently adjusted as necessary cannot be assured. These actuarial calculations are based on past experience with similar policies, forecasts regarding the future, and actuarial models. Over time, these assumptions could prove to be inaccurate, for example due to influence of inflation factors within claim amounts or costs and might therefore necessitate additional expenditures. Besides this, the interest rate development may be forecasted wrong. Despite efforts to minimise such risk, deviations can occur if data is interpreted incorrectly or external factors outside the influence of the Hannover Re Group change.

A price determination which appropriately reflects the previously mentioned risk in the property and casualty reinsurance is complicated due to the increasing complexity and long-term nature of the run-off. In the insurance and reinsurance market this was demonstrated in the past, for example, by claims connected with asbestos and claims from the attack on the World Trade Center. On basis of the actual future development – especially with respect to risks that have currently not even been recognized as such – or as a consequence of the inaccurate selection or application of methods to calculate the constituted provisions, the Hannover Re Group might be compelled to increase the provisions to an unpredictable extent.

Should it be necessary to increase provisions or liabilities this could negatively affect the net income respectively cash flows and subsequently the capital adequacy of the Hannover Re Group.

Man-made catastrophe risk

Man-made disasters are partially covered by insurance policies in the property and casualty and life and health (re)insurance written by the Hannover Re Group. Complex technology intersecting with increased population density, infrastructure and higher rates of utilization of natural resources increase the likelihood and the magnitude of catastrophic man-made events. Man-made disasters involving chemical, biological or nuclear hazards in particular bear high potential for losses covered by companies within the Hannover Re Group.

Geopolitical risks have increased worldwide since the terror attacks on the United States on 11 September 2001, especially the risks of terrorist attacks and potential military responses to them, as well as risks created by political tensions between countries. The Hannover Re Group, as many other reinsurance companies, tries to exclude terror risks from their insurance

terms, or considerably increased the premiums for the insurance of these risks. However, the potential of terror risks materializing could not be completely eliminated by these measures. While, on the one hand, an exclusion of liability is not possible with respect to all insurance contracts, consequential damage caused by terror attacks such as fire may, on the other hand, still give rise to claims brought against companies of the Hannover Re Group by policyholders. Another risk is that potential future terror attacks might not be clearly identifiable as such or that there is at least no proof of a terror attack having occurred. If, in these cases, the limits or exclusions provided for in the insurance contracts cannot be enforced, this would result in increased claim expenditure. Hannover Re Group cannot definitely assess the consequences that future terror attacks may have on its business activities. Increased political risks and risks resulting from potential future terrorist attacks may have an adverse effect on the Hannover Re Group's net income.

In recent years, Hannover Re had offered insurers protection against cyber risk. Cyber-attacks on critical systems are becoming increasingly common. They can cause considerable financial losses and also damage corporate reputations. Moreover, they can severely hamper private and public life, especially if critical infrastructures are impacted – such as the health, transportation, traffic and energy sectors. In such instances supply bottlenecks with lasting effects as well as major disruptions to public safety may ensue. In a networked world the repercussions of cyber-attacks are intensifying because the volume of data stored around the world is constantly growing – and in this context it is not only one's own technical infrastructure that needs to be secured. On the contrary, the trend towards cloud computing is increasingly shifting the focus to third-party infrastructures and the associated network connection. Growth in connectivity between digital and physical worlds as well as the progress in commercial deployment of "internet of things" and "artificial intelligence" will further increase risk aggregation effects. Therefore, cyber events covered by the Hannover Re Group may have a negative influence on its net income.

Premium risk

The business conducted by the Hannover Re Group is founded on the deliberate assumption of risks through the conclusion of insurance and reinsurance contracts.

In deciding on whether reinsurance or retrocession agreements are to be entered, the Hannover Re Group relies on the provision of correct and sufficient risk information by the respective ceding company. Should the Hannover Re Group, on the basis of incorrect or incomplete information, wrongfully assess the covered risks, this may result in additional expenses. Even if the Hannover Re Group would have recourse against the ceding company it cannot be assured that these claims are adequate and enforceable. Inaccurate or inadequate information could result in the underwriting of unprofitable or loss-making reinsurance or retrocession contracts.

Furthermore, the Hannover Re Group makes use of risk quantification models based on simplified assumptions that cannot fully reflect actual circumstances. In addition to this, cedants may write business, the quality of which is incorrectly assessed by the Hannover Re Group as more favourable than it actually is.

Property and casualty reinsurance is a cyclical business. The same is true to a lesser extent of life reinsurance. The cycles in the reinsurance business are periods characterised by intense price competition and less restrictive underwriting standards followed by periods of higher premium rates and more selective underwriting standards. This means that the business volume of the Hannover Re Group does not develop in a linear manner, hence the volume of reinsurance business is subject to considerable fluctuations, which can be attributed to a broad range of factors. On the one hand, competition has increased in recent years in the reinsurance markets, especially as a result of market entry by new competitors, a general high availability of capital and thus capacities and as a result of large customers attempting to bear standard risks themselves or cover them through their own captive insurance companies. A continuation of this trend could reduce the volume of reinsurance and premiums in this segment. Other factors, which cannot always be foreseen and/or influenced, include *inter alia* the frequency and scale of catastrophic events, the availability of reinsurance capacities, the volatility of capital markets, the occurrence of new risks (for example as a result of new technologies) and general economic conditions. Furthermore, these factors can also bring about changes in treaty conditions and hence profit margins or lead to a slowdown or decline in the business development adversely affecting the financial position or net income of the Hannover Re Group.

Longevity and mortality risk

Life reinsurance business predominantly includes mortality risk – which provides a lump sum payment upon death of the life insured, and longevity risk – which typically provides a regular income for life. Mortality risk is the core business of the Life & Health reinsurance business.

In the last years, Hannover Re Group considerably extended covers for longevity business in the United Kingdom and in the process of expanding this offering into other markets. The ageing population in some countries has led to an increasing latent demand for annuity and pension provision. Longevity risk affects contracts where benefits are based upon the likelihood of survival, e.g. the risk to which a pension fund or life insurance company could be exposed as a result of higher-than-expected pay-out patterns. Increasing life expectancy trends among annuity policyholders and pensioners can result in pay-out levels that are higher than originally accounted for. As a result, as life expectancy increases, strains are placed on such organizations obligated to pay higher retirement benefits than initially expected.

In case, a similar movement of mortality is observed between mortality and longevity business, this has an offsetting effect. However, the portfolios covered in mortality versus longevity risk are typically different (e.g., different countries, gender structure, age groups or distribution channels) which may reduce the offsetting impact.

Adverse development can result in higher-than-expected pay-out patterns and therefore affect the cash flow and profitability of the Hannover Re Group.

Life and health catastrophe risk

The Life & Health reinsurance business of the Hannover Re Group may be affected by events that affect a number of lives simultaneously. Such events could affect the experience of both the mortality and the morbidity at the same time. Consequently, an influenza pandemic is a material risk as it has the potential to impact all markets across the world. A pandemic, whether influenza or another infectious disease, has the potential to affect a significant percentage of the world's population, causing a high level of sickness and an increase in mortality rates. This could imply a temporary spike in mortality and morbidity claims and impact the net income of Hannover Re Group accordingly. Please also refer to "*COVID-19 risks and pandemic crisis in general*" below.

Morbidity and disability risk

Companies of the Hannover Re Group write different types of business where claim payments are contingent on the health status of individual lives. The most relevant types of business are health business (which compensates for medical expenses incurred), critical illness business (where benefits are paid upon the occurrence of pre-defined diseases) and disability business, (which provides a regular income or a lump sum payment upon continued inability to work as a result of a long-term illness or disability). For disability income business, morbidity benefits are often payable over potentially many years and there is uncertainty involved in estimating the number of years over which benefits will be paid.

The liabilities for future policy benefits for individual risks or classes of business may be greater or less than assumed and - if greater - negatively affect the profitability and cash flow of the Hannover Re Group.

Lapse and expense risk

Life or health insurance policies (with the exclusion of certain annuity business) typically provide a lapse option to the policyholders. The pricing and valuation of life insurance and reinsurance business therefore requires assumptions on future policyholder behaviour. Such behaviour may be different from expectations due to market development, capital market movements or other circumstances. If actual lapses differ from expectations, the amount of future premium income and claims outgoing will change.

As long-term business, the life and health business requires long-term administration efforts. Expense risk relates to the uncertainty of the cost of servicing and administering underwritten contracts. Administration expenses are exposed to inflation changes. Therefore, the risk that actual expense rates deviate from expected rates might lead to a negative influence on Hannover Re Group's economic result and net income.

Strategic and rating risk

The strategic risk represents a possible inability to implement appropriate business plans and strategies, make correct decisions, allocate resources right or adapt to changes in the business environment timely.

Within the scope of its reinsurance business, the Hannover Re Group underwrites the business of primary insurers, which means that facts and circumstances in the insurers' environment may also indirectly influence the Hannover Re Group, in particular that insurers may write less business – as a result of which a smaller volume is also reinsured. The business result of the Hannover Re Group is influenced by its ability to acquire new insurance business at advantageous conditions, to expand existing profitable business relationships and to raise capital on the financial markets.

Of particular significance to this ability is the evaluation of the financial strength and creditworthiness and hence also indirectly of the competitiveness of the Hannover Re Group and its individual companies by specialized agencies (hereinafter referred to as its "rating"). The most important rating for the Hannover Re Group is the Insurer Financial Strength Rating, which evaluates the financial strength of the Issuer on the basis of the factors that are relevant to policyholders and ceding companies. These factors include, most notably, the capital adequacy, market positioning, risk management and earnings outlook.

The current Insurer Financial Strength Rating for the Issuer from S&P Global Ratings Europe Limited ("**S&P**") is "AA- " ("Very strong", stable outlook), while that of A.M. Best (EU) - Rating Services B.V. ("**A.M. Best**") is "A+" ("Superior", stable outlook). Rating agencies review their ratings and assessment methods continuously and could downgrade the Issuer's ratings, whether on the basis of changes in the results of operations and financial condition of the Issuer, of the Hannover Re Group or as a result of changes in the assessment of the reinsurance industry. A downgrade in the rating can have significant adverse implications for the conditions of new and existing business, impair competitiveness, limit access to the capital markets and increase the costs of financing for the Issuer. In addition, a downgrade can result in the materialization of new or accelerated maturity of existing liabilities that are contingent upon maintenance of a particular rating. A significant downgrade of the rating by S&P or A.M. Best could detrimentally affect the ability of the Hannover Re Group to generate new business.

Counterparty default risk

As part of its business, companies belonging to the Hannover Re Group acquire a large number of receivables and recoverables against counterparties, especially cedants, retrocessionaires, insurance brokers, financial institutions and intermediaries. Third parties that owe money, securities or other assets to companies of the Hannover Re Group may not pay or perform under their obligations. These parties include the issuers whose securities the Hannover Re Group companies hold, borrowers under loans made, trading counterparties, counterparties under swaps, credit default and other derivative contracts, clearing agents, exchanges, clearing houses and other financial intermediaries. If obligors of the Hannover Re Group companies experience financial difficulty and cannot or do not pay the full amounts owed to it, the Hannover Re Group would be exposed to risks of financial losses and a possible downgrading of its credit rating, and might be required to write down or write off certain assets. In addition, with respect to secured or covered transactions, the Hannover Re Group companies' credit risk may be exacerbated when the collateral held by those transactions cannot be realized or is liquidated at prices not sufficient to recover the full amount of the loan, reinsurance recoverable or derivative exposure.

As a result, default by one or more of these parties on their obligations to the Hannover Re Group companies due to bankruptcy, lack of liquidity, downturns in the economy or real estate values, operational failure or other reasons, or even rumours about potential defaults by one or more of these parties or regarding the financial services industry generally, could lead to market value losses or defaults harming the Hannover Re Group companies.

The Hannover Re Group systematically uses retrocessions and protection covers or transfers risks from reinsurance business to the retrocession (and in a limited extent to the capital) markets to smooth results and optimize its net income. Hannover Re also accepts reinsurance risks and passes these on to retrocessionaires only for the purpose of earning a fee ("fronting"). In this context it attaches considerable importance to the quality and credit status of its retrocessionaires or the providers of a security. Often, the retrocessionaires' obligations are highly collateralised. Deteriorating market

conditions for retrocession globally or the financial situation at retrocessionaires may lead to the risk that individual claims cannot be recovered if individual retrocessionaires should become unable or unwilling to pay.

In life and health reinsurance, a particular risk arises because some capital investment portfolios are not directly under the control of the reinsurer. This applies to certain U.S. life insurance policies ("modified coinsurance"). Under these contracts, the cedant retains securities in a securities account that secure the risks that it has ceded to the reinsurer. Payments to the reinsurer are rendered only at a later point in time and contain a portion of the gross premium collected from the cedant and the income on the securities. Accordingly, the Hannover Re Group has to rely on third parties for the proper administration of the related investment portfolio. In such circumstances, it is common for the reinsurer to mitigate this risk by having agreed investment guidelines with the cedant which specify the risk limits to which the underlying portfolio is to be managed to. Changes in the value of such investment portfolios may adversely impact the net income of the Hannover Re Group.

Emerging risk

The term "emerging risks" is used to refer to previously unknown risks that could cause substantial future losses and, therefore, are of major concern to insurance and reinsurance companies. Unlike traditional risks, emerging risks are difficult to analyse because they often exist as a hidden risk. Insurance premiums for emerging risks are difficult to calculate due to lack of historical data about or experience with such risks or their consequences. The hallmark of emerging risks (such as pandemics, climate change, cyber, nanotechnology or disruption of critical infrastructure) is that the content of such risks cannot as yet be reliably assessed – especially with respect to Hannover Re Group's treaty portfolio. Such risks evolve gradually from weak signals to unmistakable tendencies. Presently, the consequences of potential, worldwide climate change is considered an emerging risk. There are a wide scientific consensus and a growing public concern that globally increasing emissions of greenhouse gases, especially carbon dioxide, are causing an increase in the average worldwide surface temperatures. This increase in average temperatures could increase the frequency of hurricanes, floods, droughts, forest fires, and could cause sea levels to rise due to the melting of the polar ice caps.

The Hannover Re Group aims to detect, assess, steer and monitor these risks through a process involving experts from the relevant fields of knowledge. Despite its efforts at early identification and continuous monitoring of emerging risks, Hannover Re may not be able to identify all emerging risks and implement measures to avoid or minimize claims exposure to them. Defects and inadequacies in the identification and response to emerging risks could lead to unforeseen damages, furthermore the realization of one or several of these risks could have a detrimental effect on the assets, financial position and net income of the Hannover Re Group.

COVID-19 risks and pandemic crisis in general

Since the beginning of 2020, the world experienced the emergence of the new COVID-19 virus that has been declared a pandemic by the world health organization, with effects on all different business segments of Hannover Re Group. Public and private measures to mitigate the virus' expansion as restrictions on travel, imposed quarantines, closures of workplaces or social distancing measures could have a significant negative effect on the global economy and international financial markets in general and on Hannover Re Group in particular. The implications of the resulting crisis depend on factors like its duration, spread of the virus and the timing, suitability and effectiveness of measures imposed by international authorities. There is no guarantee that these worldwide measures, or a combination thereof, are effective against this pandemic and its evoked crisis, which may result in an increase of underwriting, capital market, liquidity and operational risks for Hannover Re Group and as well may have significant negative effects on the operating results and financial situation of the company.

COVID-19 may affect Hannover Re Group in conducting its business successfully in different ways. The social distancing measures implemented by worldwide countries to slow the virus' spread may result in a severe global recession and financial crisis. A largely reduced economic activity for a longer period of time could lead to a final close of businesses accompanied with a significant rise in unemployment. Lack of people's income may result in defaults of outstanding debts and a decline in consumer spending including on insurance products.

Hannover Re Group is as of the date of this Prospectus expecting losses in many classes of the property and casualty reinsurance business, specifically for the coverage of event cancellations and business interruption. This includes a cover connected with the 2020 Olympic Games in Japan. At the date of this Prospectus, losses in other business segments, such as credit and surety reinsurance, aviation, marine, workers' compensation, Directors&Officers as well as other property or casualty lines of business cannot be reliably estimated and have potential to become high losses for the Hannover Re Group.

In life and health reinsurance, Hannover Re Group is as of the date of this Prospectus anticipating impacts on its portfolio of mortality covers, which could be any scenario between a slightly increased mortality payments within the life reinsurance segment, up to an extreme 200-year pandemic loss.

When it comes to the investments of Hannover Re Group, the Group does have significant exposures to corporate bonds and related asset classes in the fixed-income spectrum as well as private equity and real assets. The consequences of an economic downturn may make themselves felt here. In the course of the year 2020, depending on the effectiveness and efficiency of monetary and fiscal rescue measures, Hannover Re Group expects not only valuation declines but also defaults. As of the date of this Prospectus, it is too early to make any sufficiently valid assessment of their potential scale.

In the financial environment of the COVID-19 pandemic as of the date of this Prospectus, the liquidity situation of Hannover Re Group is influenced by the economic situation of its subsidiaries and branches. Possible risks could arise in case of negative developments within the financial markets and if a Hannover Re Group entity needs to be recapitalized.

Any of the above and others of business areas of Hannover Re might be negatively affected by the COVID-19 crisis and losses resulting thereof. The COVID-19 crisis or any other risk complex related to another pandemic crisis could lead to a slowdown or decline in the business development adversely affecting the financial position or net income of the Hannover Re Group.

Risks related to the Capital Markets

The Hannover Re Group's financial results are, amongst other things, subject to market risk on its invested assets. Risks can arise, among other things, from adverse changes in interest rates, inflation rates, equity prices, credit spreads, foreign exchange rates, real estate prices and other relevant parameters such as market volatility or liquidity. But even natural events like a pandemic may have a significant effect on the capital market and any of the asset classes of Hannover Re Group.

Default and spread risk

Credit spread risk is an important factor for Hannover Re Group's fixed-income security holdings. Credit spread refers to the difference in the rate of interest between a risk-bearing security and a risk-free security of the same tenor and currency. Market changes in these risk premiums lead to changes in the market value of the corresponding securities in a manner analogous to changes in prevailing interest rates. An increase in credit spreads beyond the expected figures could give rise to higher default probabilities for bonds and lower prices, causing negative impact on Hannover Re Group's capital position. If defaults occurred with a higher frequency than the initial credit spreads implied this would have an impact on net investment income.

The Hannover Re Group companies also have exposure to a number of financial institutions and other corporates in the form of debt instruments, derivative transactions and equity investments. Although Hannover Re Group's investment guidelines are designed to limit undue concentration of risk, the Hannover Re Group could become significantly exposed to a particular counterparty. In addition, a feared or actual deterioration in the credit of one or more major counterparties, could lead to write downs for a large number of other market participants. Existing protection schemes, such as the deposit insurance fund (*Einlagensicherungsfonds*) of the Federal Association of German Banks could turn out to be insufficient to avoid or compensate for losses of payments. General economic uncertainty and volatility in the capital markets could intensify these risks going forward. If a significant amount of its investments becomes impaired for any reason, this could materially and adversely affect Hannover Re Group's results of operations and financial condition.

In addition to that, the small portion of insurance linked securities Hannover Re is invested in is also subject to risks arising primarily from natural catastrophes. The occurrence of risks arising from the related natural catastrophes could also have a negative impact on Hannover Re Group's investment income, results of operations and financial condition as well.

Foreign exchange risk

The Hannover Re Group writes (re)insurance business worldwide in numerous international currencies and prepares annual and interim financial statements in Euro, as a consequence of which the Hannover Re Group is exposed to the risk that actual foreign currency exchange rates deviate from previous exchange rates. Due to the fact that the financial statements of some of its foreign subsidiaries, associated companies, special purpose entities and special funds are prepared in non-Euro currencies, the largest volumes of which are in the U.S. Dollar, the British Pound, the Australian Dollar, the Canadian Dollar and the South African Rand, evolving currency translation risk might result in a lower value of these investments in foreign entities and a decreased shareholders' equity and could have a negative impact on the capital adequacy of the Hannover Re Group following adverse developments of such currencies compared to the Euro.

Foreign exchange risk can also arise if the assets and liabilities of Hannover Re Group are not in the same currency, or if contracts for administrative and other services are contracted in a currency different to the currency implied in the premium and loss determination. In some jurisdictions, the sale of contracts in other than the local currency leads to an impact on rates of persistency (e.g. minimum interest) or discontinuance (lapse ratio) in the event that the policyholders are exposed to a mismatch. Such currency transaction in connection with such contracts might also adversely affect the financial condition, results of operations and cash flow of the Hannover Re Group.

Furthermore, Hannover Re receives dividends, profit transfers and interest payments from its foreign subsidiaries, associated companies, special purpose entities and special funds, partly in currencies other than Euro. A negative development of exchange rates might result in a lower value of these cash flows in Euro terms.

Equity risk

Equity risk derives from the possibility of unfavourable changes in the value of listed and unlisted equities, equity derivatives or equity index derivatives in the portfolio of the Hannover Re Group. The portfolio predominantly includes investments in unlisted (private) equities and, to a smaller extent, investments in listed equities.

Although private equity investments are not as directly related to stock markets as listed equities, there is a certain degree of influence from stock market movements on them. However, changes in their fair value here tend to be prompted less by general market conditions than by entity-specific assessments. The risks are associated principally with the business model and profitability of the entities invested in.

Unfavourable changes in the value of investments in equities can have a material negative impact on the financial conditions, results of operations, cash flow and shareholders' equity of the Hannover Re Group.

Interest rate risk

Changes in prevailing interest rates (including fluctuations in the level of both short- and long-term interest rates, or enduring negative rates) may adversely affect the Hannover Re Group's assets and net income. The majority of the Hannover Re Group's holdings are invested in fixed-income securities; the bulk of which are denominated in Euro and U.S. Dollar. An increase in the interest rate level could substantially decrease the value of the financial assets. If the market price were to fall below amortised cost for a sustained period, this could have a negative impact on Hannover Re Group's capital position.

Risks may also arise from a protracted period of low interest level in the international financial markets which might affect the asset management performance. Should the current level of interest rates be sustained or decline even further, this may adversely affect the financial position and net income of the Hannover Re Group.

Additionally, the assets and liabilities of the Hannover Re Group are not necessarily fully matched in terms of interest rate duration (e.g. on equity-backing securities). Therefore, an interest rate risk consequently remains. A change in interest rates may accordingly have an adverse effect on the economic or general capitalization of the Hannover Re Group.

Real asset risk

Hannover Re Group companies have a significant real estate and infrastructure investment portfolio in form of direct and fund investments. Real estate and infrastructure risk may continue to grow owing to further extending the investments in these sectors. Market values of real asset projects and underlying fund investments are exposed to downturn in market prices and volatility of their income. Real asset risk is growing along with the size of the associated portfolio, reflecting exposure to different sectors and geographies.

The occurrence of any of the risks described above could have a material negative impact on the financial conditions, results of operations and cash flow of the Hannover Re Group.

Operational Risks

Compliance and regulatory change risk

As an internationally operating reinsurance group, the Hannover Re Group is active in many countries. The business of most Hannover Re Group companies is subject to detailed and extensive laws and regulations. In most of the jurisdictions, in which the companies of the Hannover Re Group operate, the conduct of insurance and reinsurance business requires approvals and licenses granted by courts, public and other authorities following an audit and licensing process. Hence, Hannover Re Group companies are subject to the political and legal framework in each of these countries and relies to a certain extent on the cooperation and reliability of public authorities (e.g. insurance supervisory authorities) and local business partners (e.g. distributors). Embargoes and financial sanctions against certain governments, entities or individuals also pose risks for Hannover Re Group's international activities. In the event of violations of embargoes or financial sanctions, or in case of data protection failure, Hannover Re Group could face legal consequences (for example, withdrawal of licenses or fines) or suffer reputational risks from actual or alleged violations of its various legal duties. In light of the large number of regulations, provisions and standards of conduct with which the Hannover Re Group must comply in various countries, there is an inherent risk of liability due to actual or alleged violations of such norms, which may also lead to regulatory bodies investigating Hannover Re Group's business with potential financial and/or reputational risks being associated therewith. The Group aims to reduce such risk by means of comprehensive compliance programs, but these compliance programs may fail to prevent such violations.

Non-compliance with laws and regulations may give rise to costs or otherwise adversely affect the business of the Hannover Re Group. In some countries, changes may also be introduced with retroactive effect. Any of the above could also lead to increased regulatory supervision, affect Hannover Re Group's ability to attract and retain customers, impair access to the capital markets, imply higher capital requirements and capital costs or have other adverse effects on the Hannover Re Group in ways that are not predictable. As an example, the Hannover Re Group and its legal entities in the EU face the risk that the regulator withdraws the approval to use an internal capital model due to non-compliance with regulatory standards. As a consequence, the Hannover Re Group and its legal entities in the EU would have a disadvantage compared to peers allowed to use an internal model and, could face higher financing costs for issuing additional instruments eligible as own funds which may consequently negatively impact financial condition and net income of the Hannover Re Group.

Business process and data quality risk

Business process risks are associated with the risk of deficient or flawed internal processes, which can arise as a consequence of an inadequate process organization. Inadequate processes can lead to inefficiencies and cause delays in operations or incapability to produce required results. Accurate and credible data is a critical success factor. Wrong or flawed data can lead to incorrect accounts and statements. Furthermore, analysis and projections for pricing, reporting and steering purposes can be distorted by incorrect data. Data quality plays also a critical role for insurance companies

using internal models. It cannot be completely ensured that all data received, stored or produced in a complex organization is accurate.

Inadequate processes and inaccurate data can have a negative impact on costs and earnings of Hannover Re Group and could also negatively affect its reputation.

Tax risk

The respective tax laws in the various countries in which Hannover Re and its group companies operate are constantly changing. The tax burden of the Hannover Re Group is dependent on various aspects of tax laws as well as their application and interpretation. Tax laws can be changed retroactively, and their application/interpretation can be amended by the tax authorities and the courts. Such changes could increase the tax burden of the Hannover Re Group and could have a detrimental effect on the assets, financial position and net income of the Hannover Re Group.

In particular:

- Hannover Re Group could be adversely affected if Bermuda is included on an EU list of non-cooperative jurisdictions for tax purposes or if the effective 95% tax exemption on dividends received by subsidiaries that are based on Bermuda ceases to apply due to a change of German tax laws or as a possible consequence of Bermuda being included on an EU list of non-cooperative jurisdictions for tax purposes.
- Significant additional tax liabilities of the Hannover Re Group may arise from inaccurate estimates as to tax provisions, tax refund claims, tax reserves and deferred tax items. In addition, the (partial) non-recognition of technical reserves for tax purposes could lead to additional tax liabilities. Further, changes in corporate tax rates might affect the value of deferred tax assets and liabilities.
- In the United States, the "Tax Cuts and Jobs Act" has significantly changed how in particular multinational enterprises are taxed. As part of this U.S. tax reform, the Base Erosion and Anti-Abuse Tax (the "**BEAT**"), which may prevent certain deductions of specified payments to a non-U.S. related person, as well as any future changes in its interpretation e. g. by the U.S. Internal Revenue Service ("**IRS**"), if any, may apply to the Hannover Re Group from 2018 onwards. The BEAT could significantly increase the U.S. tax liability of the Hannover Re Group. This could adversely impact the results of operation and the financial condition of the Hannover Re Group.
- The Hannover Re Group manages risk and capital by selectively retaining business in risk accumulation and aggregation points where diversification and risk management techniques can be used most efficiently. The aggregation points for the Group's North America Life business have traditionally been Ireland and Germany, but in light of Hannover Life Reassurance Company of America (Bermuda) Ltd. ("**HLRA Bermuda**")'s significant growth coupled with the U.S. tax reform, the Group has changed the jurisdiction of this aggregation point to Bermuda. The Hannover Re Group has increased the capitalization of HLRA Bermuda and has moved a significant portion of U.S. sourced inbound business to HLRA Bermuda in 2018. HLRA Bermuda has elected to be treated as a US corporation for tax purposes and is subject to corporate income tax in the United States. The movement of the business to HLRA Bermuda entails an inherent transfer pricing risk which might result in additional tax liabilities for the Hannover Re Group.
- Internal restructurings within the Hannover Re Group can subject Hannover Re to unanticipated tax problems. Tax authorities and/or tax courts could classify certain restructuring measures in a manner which results in additional tax liabilities or the loss of other tax benefits for the Hannover Re Group.
- The European Union adopted Council Directive (EU) 2016/1164 laying down rules against tax avoidance practices that directly affect the functioning of the internal market (so called "**ATAD**") on 12 July 2016. The ATAD provides for a minimum harmonization of the controlled foreign corporation ("**CFC**") rules of the EU member states. On the basis of the ATAD, Germany is expected to change its local CFC legislation. The change of German CFC legislation might lead to additional tax liabilities for the Hannover Re Group. As of the date of this prospectus, draft regulations on the change of Germany's CFC legislation have not been published yet.

- Many countries, together with the OECD, are currently considering to substantially change the current system of international taxation which, if enacted, could increase the tax obligations in countries where the Hannover Re Group does business.

Fraud risk

Fraud risks refer to the risk of intentional violations of laws or regulations by members of staff (internal fraud) and/or by external persons or organizations (external fraud), in order to gain a personal advantage

The Hannover Re Group is exposed to risk of misconduct and fraud, including policy (i.e. application-related) fraud and claims fraud arising from a variety of sources including employees, suppliers, intermediaries, customers and other third parties.

Hannover Re has in place controls aimed to ensure that risk selection is within the Group's risk appetite and that risk assumption adheres to the Group's pricing and reserving guidelines. Notwithstanding these controls, errors or misconduct by employees or agents may lead to losses, including direct financial loss and losses relating to redirecting payments, making false payments, or falsifying data to improve employee performance statistics. These may arise from, among other things, dealings with brokers, fraud, errors, failure to document transactions properly, failure to obtain proper internal approval, or failure to comply with internal guidelines and/or regulatory requirements. It is not always possible for the Hannover Re Group to deter or prevent employee or agent misconduct and the precautions taken to prevent and detect this activity have not been and may not in the future be completely effective in all cases.

The Hannover Re Group is also at risk from customers who misrepresent or fail to provide full disclosure in relation to the risk against which they are seeking cover before such cover is purchased, and from customers who fabricate claims and/or inflate the value of their claims. It is also at risk from its employees failing to follow procedures designed to prevent fraudulent activity, as well as from its agents' fraudulent activity, such as falsifying policies or failing to remit premiums collected from customers on behalf of the Hannover Re Group. Additionally, attempts at fraud are becoming more sophisticated, including through the use of technology. A failure to combat the risks of fraud effectively could adversely affect the profits of the Hannover Re Group as claims incidence and average pay-outs could increase.

Other Risks

Liquidity risk

The liquidity risk refers to the risk of Hannover Re Group being unable to meet its financial obligations when they become due. The liquidity risk consists of the refinancing risk (necessary cash could not be obtained or could only be obtained at increased costs) and the market liquidity risk (financial market transactions could only be completed at a poorer price than expected due to a lack of market liquidity). Core elements of the liquidity management of the investments of Hannover Re Group are, in the first place, management of the maturity structure of its investments on the basis of the planned payment profiles arising out of Hannover Re Group's technical liabilities and, secondly, regular liquidity planning as well as the asset structure of the investments. Above and beyond the foreseeable payments, unexpected and exceptionally large payments may pose a threat to liquidity. An incorrect usage of the above processes and instruments could have a detrimental effect on the assets, financial position and net income of the Hannover Re Group.

Changes in accounting standards

Changes to EU endorsed International Financial Reporting Standards ("**IFRS**") for (re)insurance companies have been proposed in recent years and further changes may be proposed in the future.

On 18 May 2017, the International Accounting Standards Board (the "**IASB**") published IFRS 17 'Insurance Contracts' with an effective date of 1 January 2021, though it was announced in November 2018 that the IASB had decided to propose extending the effective date to 1 January 2022. In June 2019, the IASB published an Exposure Draft titled Amendments to IFRS 17 (the "**Exposure Draft**"), detailing its review of the reported concerns and implementation challenges of IFRS 17 and proposing to defer the effective date to 1 January 2022. At its meeting on 17 March 2020, the IASB agreed to defer the effective date of IFRS 17 to annual periods beginning on or after January 2023 and also agreed

to extend the fixed expiry date of the temporary exemption from applying IFRS 9 for qualifying insurers (as contained in IFRS 4), so that all entities must apply IFRS 9 for annual reporting periods beginning on or after 1 January 2023. The publication of the final amendments is expected in the second quarter of 2020.

IFRS 17 introduces significant changes to the presentation and measurement of insurance contracts, including the effect of technical reserves and reinsurance on the value of insurance contracts.

Similarly, the Hannover Re Group continues to defer the implementation of IFRS 9 'Financial Instruments' (which replaced IAS 39 with effect from 1 January 2018) until 1 January 2022 to coincide with the introduction of IFRS 17.

IFRS 17 and IFRS 9 are intended to increase transparency, consistency and comparability in the reporting of new and existing business by (re)insurers, with clearer reporting on sources of profits and quality of earnings. The new standard changes the reported value of insurance and reinsurance contracts in the balance sheet and recognition of revenue in the profit or loss.

Given the current stage of the Group's implementation of IFRS 17 and IFRS 9 together with recent further proposed amendments to IFRS 17 by the IASB and developing industry practice and interpretation of the same, there is uncertainty as to what the impact of implementing these standards will be in the Hannover Re Group's profit or losses and balance sheet. Consequently, changes in IFRS 17 and IFRS 9 could have an adverse effect on the Hannover Re Group's financial performance and condition (including through changes affecting the calculation of Shareholder's equity or taxation). These and any other changes to IFRS, to the extent applicable, that may be proposed in the future, whether or not specifically targeted at (re)insurance companies, could have a material adverse effect on the Hannover Re Group's business, prospects, financial condition or net income.

Risks relating to the Bonds

Risks associated with the characteristics of the Bonds

The risks associated with the characteristics of the Bonds include risks resulting from the subordination of the Bonds, risks related to the fixed rate interest rate applicable until the First Reset Date, risks related to the floating rate interest applicable from the First Reset Date, risks related to interest rate benchmarks, risks related to the nature of the Bonds as long-term securities, risks related to a possible early redemption of the Bonds and risks in connection with the application of the German Act on Issues of Debt Securities (*Gesetz über Schuldverschreibungen aus Gesamtemissionen*, "**SchVG**").

Risks resulting from the subordination of the Bonds

The obligations under the Bonds constitute unsecured obligations of the Issuer ranking *pari passu* among themselves.

The terms of the Bonds provide that the obligations of the Issuer under the Bonds rank subordinated to all of the Issuer's (i) unsubordinated obligations, (ii) obligations subordinated pursuant to § 39(1) of the German Insolvency Code (*Insolvenzordnung*), (iii) subordinated obligations ranking at least *pari passu* with the Issuer's obligations subordinated by operation of law pursuant to § 39(1) of the German Insolvency Code and (iv) subordinated obligations required to be preferred by mandatory provisions of law.

In the event of the dissolution, liquidation, insolvency or any proceeding to avoid insolvency of the Issuer, the obligations of the Issuer under the Bonds will be fully subordinated to all claims against the Issuer which pursuant to the Terms and Conditions are expressed to, or by operation of law, rank senior to the obligations of the Issuer under the Bonds. In any such event, payments will not be made under the Bonds until all claims ranking senior to the obligations of the Issuer under the Bonds have been satisfied in full.

The holders of the Bonds (the "**Bondholders**" and each a "**Bondholder**") must be aware that, in the circumstances described above, (i) the Issuer will make payments in respect of the Bonds only in accordance with the subordination described above, and (ii) the rights of the Bondholders under the Bonds will be subject to the provisions of insolvency laws applicable to the Issuer from time to time. In a liquidation, dissolution, insolvency, composition or other proceeding

for the avoidance of insolvency of, or against, the Issuer, it is very likely that the Bondholders may recover proportionately less than the holders of unsubordinated obligations of the Issuer or may recover nothing at all.

In addition to other limitations on the payment of interest, Arrears of Interest and principal (also see "*Risks related to the nature of the Bonds as long-term securities*" and "*Risks related to deferral of interest payments and restrictions on payment of Arrears of Interest*" below), the Terms and Conditions provide for a pre-insolvency payment prohibition. This means that prior to the commencement of any insolvency or liquidation proceedings over the assets of the Issuer, the Bondholders will only have a due (*fällig*) claim for the relevant scheduled payment of interest, payment of Arrears of Interest or for redemption if no reason for the opening of insolvency proceedings in respect of the Issuer in accordance with the applicable insolvency regulations exists and if the payment of the relevant amount would not itself cause the insolvency of the Issuer or accelerate the process of the Issuer becoming insolvent. These payment conditions constitute a payment prohibition to pay meaning that any payments on the Bonds may only be made by the Issuer if it is made in accordance with the aforementioned conditions. Any payment made in breach of this prohibition must be repaid to the Issuer irrespective of any agreement to the contrary.

Risks related to the fixed rate interest applicable until the First Reset Date

The Bonds bear interest at a fixed rate from and including the Issue Date to but excluding the First Reset Date.

During that time, Bondholders are exposed to the risk that the price of such Bonds may fall because of changes in the market yield. While the nominal interest rate (i.e. the coupon) of the Bonds is fixed until, but excluding, the First Reset Date, the market yield typically changes on a daily basis. As the market yield changes, the price of the Bonds typically changes in the opposite direction. If the market yield increases, the price of the Bonds typically falls. If the market yield falls, the price of the Bonds typically increases. Bondholders should be aware that movements of the market yield can adversely affect the price of the Bonds and can lead to losses for the Bondholders.

Bondholders should also be aware that the market yield has two components, namely the risk-free rate and the credit spread. The credit spread is reflective of the yield that investors require in addition to the yield on a risk-free investment of equal tenor as a compensation for the risks inherent in the Bonds. The credit spread changes over time and can decrease as well as increase for a large number of different reasons. The market yield of the Bonds can change due to changes of the credit spread, the risk-free rate, or both.

Risks related to the floating rate interest applicable from the First Reset Date

If the Bonds are not called during the period from and including 8 July 2030 to and including the First Reset Date, the Bonds will bear interest at a floating rate from the First Reset Date (including) until the Final Maturity Date (excluding).

The floating rate applicable to the Bonds from (and including) the First Reset Date is based on two components, namely the Euro-zone inter-bank offered rate for three-month Euro deposits ("**EURIBOR**") and a margin (the "**Margin**"). The floating rate interest is payable quarterly, and the applicable rate will be determined immediately prior to any Floating Interest Period based on the then prevailing 3-months EURIBOR rate. The Margin was fixed prior to the issue date of the Bonds and will apply to any Floating Interest Period.

Bondholders should be aware that the floating rate interest income is subject to changes to 3-month EURIBOR and therefore cannot be anticipated. Hence, Bondholders are not able to determine a definite yield to maturity of the Bonds following the First Reset Date at the time they purchase them, so that their return on investment cannot be compared with that of investments in fixed rate instruments (i.e. instruments with a coupon that is fixed until maturity).

Because the Margin is fixed prior to the issuance of the Bonds, Bondholders are moreover subject to the risk that the Margin does not reflect the market spread that investors require in addition to 3-month EURIBOR as a compensation for the risks inherent in the Bonds.

Furthermore, during each Floating Interest Period, it cannot be ruled out that the price of the Bonds may fall as a result of changes in the current interest rate on the capital market (market interest rate), as the market interest rate fluctuates.

During each of these periods, the investor is exposed to the same risk as described under "*Risks related to the fixed rate interest applicable until the First Reset Date*" above.

Interest rate benchmark risks

Reference rates and indices, including interest rate benchmarks, such as the EURIBOR, which are used to determine the interest amounts payable under financial instruments or the value of such financial instruments ("**Benchmarks**"), have, in recent years, been the subject of political and regulatory scrutiny as to how they are created and operated. This has resulted in regulatory reform and changes to existing Benchmarks, with further changes anticipated. International proposals for reform of Benchmarks include in particular the European Council's regulation (EU) 2016/1011 of 8 June 2016 on indices used as benchmarks in financial instruments and financial contracts or to measure the performance of investment funds and amending Directives 2008/48/EC and 2014/17/EU and Regulation (EU) No 596/2014 (the "**Benchmark Regulation**").

These reforms and changes may cause a Benchmark to perform differently than it has done in the past or to be discontinued. Any change in the performance of a Benchmark or its discontinuation, could have a material adverse effect on financial instruments referencing or linked to such Benchmark such as the Bonds following the First Reset Date.

Following the First Reset Date, interest amounts payable under the Bonds are calculated by reference to the EURIBOR, which is provided by the European Money Market Institute. The rate of interest for each Floating Interest Period will be determined on the corresponding Interest Determination Date by reference to Reuters Page EURIBOR01 (or such other screen page of Reuters or such other information service, which is the successor to Reuters Page EURIBOR01 for purposes of displaying such rates) (the "**Screen Page**"). In circumstances where EURIBOR is discontinued, neither the Screen Page, nor any successor or replacement may be available.

Under the Terms and Conditions, certain benchmark replacement provisions will apply if a Benchmark used as a reference for the calculation of interest amounts payable under the Bonds were to be discontinued or otherwise unavailable:

If a Benchmark used to calculate interest amounts payable under the Bonds for any interest period has ceased to be calculated or administered, the Issuer shall endeavour to appoint an independent adviser, which must be an independent financial institution of international repute or other independent financial adviser experienced in the international capital markets. Such independent adviser will be tasked with determining whether an officially recognised successor rate to the discontinued Benchmark exists. If that is not the case, the independent adviser will attempt to find an alternative rate which, possibly after application of adjustments or spreads, can replace the discontinued Benchmark. Such adjustments or spreads are intended to be applied in order to produce an industry-accepted replacement benchmark rate, however the relevant adjustments or spreads may not be successful in doing so and the Bonds may still perform differently than if the original Benchmark had continued to be used.

If the independent adviser determines a successor rate or alternative rate (the "**New Benchmark Rate**"), such rate will replace the previous Benchmark for purposes of determining the relevant rate of interest. Such determination will be binding for the Issuer, the Calculation Agent, the Paying Agents and the Bondholders. Any amendments pursuant to these fall-back provisions will apply with effect from the effective date specified in the Terms and Conditions.

If the Issuer fails to appoint an independent adviser or if the adviser fails to determine a New Benchmark Rate following a discontinuation of a relevant Benchmark, the reference rate applicable to the immediately following reset period shall be the original benchmark rate determined on the last preceding Interest Determination Date, provided, however, that, in case of the first Floating Interest Period, the reference rate shall be the original benchmark rate on the screen page on the last day preceding the relevant Interest Determination Date on which such original benchmark rate was displayed. The same will apply if the replacement of a relevant Benchmark would result in a Regulatory Event (as defined in the Terms and Conditions).

The replacement of a Benchmark could have adverse effects on the economic return of the Bondholder compared to the applicable original benchmark rate.

Risks related to the nature of the Bonds as long-term securities including the risk of a delay of redemption

The Bonds are scheduled to be redeemed at par on 8 October 2040 (the "**Scheduled Maturity Date**"), provided that on such date the Conditions to Redemption and Repurchase (as defined and described in Terms and Conditions) are fulfilled. Before that date, the Issuer has, under certain conditions, the right to redeem or repurchase the Bonds, but is under no obligation to do so. If on the Scheduled Maturity Date the Conditions to Redemption and Repurchase are not met, redemption may be delayed beyond the Scheduled Maturity Date for an indefinite period of time. Therefore, Bondholders may receive the amounts due upon redemption at a much later point in time than initially expected.

Under the Terms and Conditions, the Bondholders have no right to require the redemption of the Bonds prior to the Scheduled Maturity Date, and on or following the Scheduled Maturity Date only if the Conditions to Redemption and Repurchase are fulfilled.

Bondholders should be aware that the Terms and Conditions do not contain any event of default provisions that would allow Bondholders to accelerate the Bonds on the occurrence of an event of default.

There is also no guarantee that an active public market in the Bonds will develop.

Prospective investors should be aware that they may be required to bear the financial risk of an investment in the Bonds for a long period and may not recover their investment before the end of this period.

Risks related to a possible early redemption of the Bonds

The Issuer may redeem the Bonds at its option, subject to the Conditions to Redemption and Repurchase being fulfilled, at par plus accrued interest on any day during the period from and including 8 July 2030 to and including the First Reset Date and on any Floating Interest Payment Date thereafter.

The right of redemption at the option of the Issuer may affect the market value of the Bonds. During any period when the Issuer may, or may be perceived to be able to, elect to redeem the Bonds, the market value of the Bonds generally will not rise substantially above the price at which they can be redeemed. Certain market expectations may exist among investors in the Bonds with regard to the Issuer making use of its option to call the Bonds for redemption prior to their scheduled maturity. Should the Issuer's actions diverge from such expectations, or should the Issuer be prevented from meeting these expectations, the market value of the Bonds may be adversely affected.

In addition, the Issuer may prior to 8 July 2030 also redeem the Bonds at its option, subject to the Conditions to Redemption and Repurchase being fulfilled, at any time at par plus accrued interest:

- (i) if, as a result of any future change in, or amendment or clarification to, the laws, regulations or other rules of the Issuer's country of domicile for tax purposes, (x) the Issuer will be obliged to pay Additional Amounts, or (y) interest payable by the Issuer in respect of the Bonds is no longer, or will no longer be, fully deductible by the Issuer for income tax purposes in the Issuer's country of domicile for tax purposes, and in each case this cannot be avoided by the Issuer taking such measures it (acting in good faith) deems reasonable and appropriate; or
- (ii) if the Issuer must not or must no longer record the obligations under the Bonds as liabilities on the balance sheet in the Issuer's annual consolidated financial statements prepared in accordance with the Applicable Accounting Standards and this cannot be avoided by the Issuer taking such measures it (acting in good faith) deems appropriate; or
- (iii) if under the Applicable Supervisory Regulations the Bonds would not be eligible (in whole or in part) to qualify for the inclusion of the Bonds in the calculation of the own funds as Tier 2 Capital for purposes of the determination of the solvency of the Issuer, the group solvency of the Hannover Re Group (including the capital adequacy of internationally active insurance groups (IAIG)) or the group solvency of the Ultimate Parent's Group (as defined in the Terms and Conditions) (including the capital adequacy of internationally active insurance groups (IAIG)), or that the Bonds no longer fulfil such requirements (in whole or in part), except where this is merely the result of exceeding any applicable limits on the inclusion of the Bonds in the determination of the own funds as Tier 2

Capital of the Issuer, of the Hannover Re Group and/or of the Ultimate Parent's Group pursuant to the Applicable Supervisory Regulations; or

- (iv) if as a consequence of a change in, or clarification to, the rating methodology (or the interpretation thereof) S&P Global Ratings Europe Limited or A.M. Best (EU) Rating Services B.V. or any respective successor, which change or clarification becomes effective on or after the date of issue of the Bonds, the capital treatment (including the assigned equity content) of the Bonds for the Issuer or the Hannover Re Group worsens in the reasonable opinion of the Issuer, as compared to the capital treatment (including the assigned equity content) of the Bonds for the Issuer or the Hannover Re Group assigned at or around the date of issue of the Bonds; or
- (v) if at any time the Issuer or any subsidiary of the Issuer has purchased Bonds equal to or more than 80 per cent of the aggregate principal amount of the Bonds initially issued and the aggregate principal amount of the Bonds is reduced by this percentage in the global note accordingly.

If the Bonds are redeemed prior to 8 July 2030, a Bondholder is exposed to the risk that due to the early redemption his investment will have a lower than expected yield and to the risks connected with any reinvestment of the cash proceeds received as a result of the early redemption. Such cash proceeds may be lower than the then prevailing market price of the Bonds.

Risks in connection with the application of the German Act on Issues of Debt Securities

Because the Terms and Conditions provide for meetings of Bondholders or the taking of votes without a meeting, the Terms and Conditions may be amended by majority resolution of the Bondholders and a Bondholder is subject to the risk of being outvoted by a majority resolution of the Bondholders. The rules pertaining to resolutions of Bondholders are set out in the SchVG and are largely mandatory. Pursuant to the SchVG the relevant majority for Bondholders' resolutions is generally based on votes cast, rather than on the aggregate principal amount of the Bonds outstanding, therefore, any such resolution may effectively be passed with the consent of less than a majority of the aggregate principal amount of the Bonds outstanding. As such a majority resolution is binding on all Bondholders, certain rights of a Bondholder against the Issuer under the Terms and Conditions may be amended or reduced or even cancelled, which could have significant negative effects on the value of the Bonds and the return from the Bonds.

Because the Terms and Conditions provide that the Bondholders are entitled to appoint a Bondholders' Representative by a majority resolution of the Bondholders, it is possible that a Bondholder may be deprived of its individual right to pursue and enforce its rights under the Terms and Conditions against the Issuer, as such right will pass to the Bondholders' Representative who is then exclusively responsible to claim and enforce the rights of all the Bondholders.

Risks resulting from the Bonds representing regulatory capital

The risks resulting from the Bonds representing regulatory capital include risks resulting from the Bonds being structured to meet the criteria to qualify as regulatory capital (own funds), risks related to deferral of interest payments and restrictions on payments of Arrears of Interest and risk related to a deferral of redemption (see also "*Risks related to the nature of the Bonds as long-term securities including the risk of a delay of redemption*" above).

Risks resulting from the Bonds being structured to meet the criteria to qualify as regulatory capital (own funds)

The Bonds are structured to meet the criteria to qualify as regulatory capital under Solvency II. The Terms and Conditions are drafted accordingly, implying various risks for investors. In particular, there is the risk that the Issuer may be obliged to defer redemption of the Bonds beyond the Scheduled Maturity Date, or to defer payment of interest beyond any Interest Payment Date, whenever the Issuer, the Hannover Re Group or HDI V.a.G. as the ultimate parent company of the Issuer (or, if HDI V.a.G. is no longer the ultimate parent company of the Issuer, the company which is the ultimate parent company of the Issuer at the relevant time) (the "**Ultimate Parent Company**") and any company consolidated by the Ultimate Parent Company under the Applicable Supervisory Regulations for group solvency purposes (the "**Ultimate Parent's Group**") does not meet certain regulatory capital requirements. Moreover, due to the deep subordination of the Bonds there is a higher risk for investors to lose all or part of their investments. Should the Bonds fail to or cease to qualify as regulatory capital, there is a risk that the Bonds may be redeemed prior to the First Reset Date.

Risks related to deferral of interest payments and restrictions on payment of Arrears of Interest

If a Compulsory Deferral Event (as defined in the Terms and Conditions) has occurred and is continuing on the relevant Interest Payment Date, interest which accrued during the period ending on but excluding such Interest Payment Date will not be due and payable (*fällig*) on that Interest Payment Date. Any such failure to pay will not constitute a default of the Issuer or any other breach of its obligations under the Bonds or for any other purpose. Interest deferred will constitute Arrears of Interest, with no certainty for Bondholders as to when these Arrears of Interest will be paid. The Issuer will only be entitled to pay Arrears of Interest at any time if the Conditions to Settlement, as further described in the Terms and Conditions, are fulfilled with respect to such payment. These restrictions also apply in the case of a mandatory settlement of Arrears of Interest, as further described in the Terms and Conditions. In particular, the resulting Arrears of Interest will not bear interest.

The same applies if no Compulsory Deferral Event has occurred, and the Issuer elects in its discretion to defer the payment of accrued interest by giving not less than 10 and not more than 15 Business Days' prior notice to the Bondholders provided that, during the six months before the relevant Interest Payment Date, no Compulsory Interest Payment Event has occurred.

Bondholders will not receive any additional interest or compensation for the deferral of interest payments.

Risks associated with the ability of the Issuer to make payments when due

The risks associated with the ability of the Issuer to make payments when due include the risk that an investor in the Bonds will lose all or some of its investment should the Issuer become insolvent and the risk that the market value of the Bonds could decrease if the creditworthiness of the Hannover Re Group worsens.

Risk that an investor in the Bonds will lose all or some of its investment should the Issuer become insolvent.

Any person who purchases the Bonds is relying on the creditworthiness of the Issuer and has no rights against any other person.

Bondholders are subject to the risk of a partial or total failure of the Issuer to make interest and/or redemption payments that the Issuer is obliged to make under the Bonds. A materialisation of the credit risk (for example, due to the materialisation of any of the "*Risks relating to the Issuer and the Hannover Re Group*" as described above) may result in partial or total failure of the Issuer to make interest and/or redemption payments under the Bonds. This risk is aggravated by the fact that the Bonds are unsecured and subordinated (see above, "*Risks associated with the characteristics of the Bonds - Risk related to subordination*") and could result in a partial or total loss of the investor's investment in the Bonds.

Risk that the market value of the Bonds could decrease if the creditworthiness of the Hannover Re Group worsens

If the likelihood decreases that the Issuer will be in a position to fully perform all obligations under the Bonds when they fall due, for example, because of the materialisation of any of the risks regarding the Hannover Re Group or the Issuer, the market value of the Bonds will fall. The market price of the Bonds may also be negatively impacted if the Issuer is perceived to be likely to defer or has to defer payments of interest. In addition, even if the likelihood that the Issuer will be in position to fully perform all obligations under the Bonds when they fall due actually has not decreased, market participants could nevertheless have a different perception.

Furthermore, the market participants' assessment of the creditworthiness of corporate debtors in general or debtors operating in the same business as the Hannover Re Group could adversely change.

If any of these risks materialises, third parties would only be willing to purchase Bonds for a lower price than the price which prevailed before such risk materialised. Under these circumstances, the market value of the Bonds is likely to decrease.

(3) No right to set-off.

The Bondholders may not set off any claims arising under the Bonds against any claims that the Issuer may have against each of them. The Issuer may not set off any claims it may have against any Bondholder against any of its obligations under the Bonds.

(4) Payment Conditions, (Pre-Insolvency) Payment Prohibition.

Prior to the commencement of any insolvency or liquidation proceedings over the assets of the Issuer

(i) any payment of interest and Arrears of Interest on the Bonds will be subject to the conditions set forth in § 4(3) and § 4(4) being fulfilled; and

(ii) any redemption and any repurchase of the Bonds will be subject to the Conditions to Redemption and Repurchase set forth in § 5(6) being fulfilled.

The conditions set forth in § 4(3) and § 4(4) and the Conditions to Redemption and Repurchase set forth in § 5(6) include the condition that, on the date on which the relevant amount of principal or interest (or Arrears of Interest) is scheduled to be paid, neither an Insolvency Event has occurred and is continuing on such date nor that such payment would cause or accelerate the occurrence of an Insolvency Event.

This means that already prior to the commencement of any insolvency or liquidation proceedings over the

Gemäß den am Tag der Begebung der Schuldverschreibungen geltenden Anwendbaren Insolvenzrechtlichen Vorschriften sind folgende Eröffnungsgründe möglich: Die Emittentin ist am vorgesehenen Zahlungstag (i) überschuldet im Sinne von § 19 InsO oder (ii) zahlungsunfähig im Sinne von § 17 InsO, oder (iii) es liegt eine drohende Zahlungsunfähigkeit der Emittentin vor.

Diese Zahlungsbedingungen begründen ein Zahlungsverbot dahingehend, dass Zahlungen auf die Schuldverschreibungen von der Emittentin nur nach Maßgabe der vorgenannten Bedingungen geleistet werden dürfen. Verbotswidrige Zahlungen sind der Emittentin ohne Rücksicht auf entgegenstehende Vereinbarungen zurückzugewähren.

- (5) Unter Beachtung von § 3(1) bleibt es der Emittentin unbenommen, ihre Verbindlichkeiten aus den Schuldverschreibungen auch aus dem sonstigen freien Vermögen zu bedienen.

§ 4 Zinsen

- (1) Festzinsperiode.
- (a) Im Zeitraum ab dem Zinslaufbeginn (einschließlich) bis zum Ersten Resettermin (ausschließlich) werden die Schuldverschreibungen bezogen auf den Festgelegten Nennbetrag mit jährlich 1,75 % verzinst. Während dieses Zeitraums sind Zinsen nachträglich an jedem Festzinszahlungstag zur Zahlung vorgesehen, und werden nach Maßgabe der in § 4(3) und § 4(4) dargelegten Bedingungen fällig.
- (b) Sofern Zinsen in Bezug auf eine Festzinsperiode oder einen Teil davon zu berechnen sind, erfolgt die Berechnung auf

assets of the Issuer the Bondholders will only have a due (*fällig*) claim for the relevant scheduled payment of interest, payment of Arrears of Interest or for redemption if no reason for the opening of insolvency proceedings in respect of the Issuer in accordance with the Applicable Insolvency Regulations exists and if the payment of the relevant amount would not cause the insolvency of the Issuer or accelerate the process of the Issuer becoming insolvent. Pursuant to the Applicable Insolvency Regulations in effect on the date of issue of the Bonds, the following reasons for the opening of insolvency proceedings apply: The Issuer is (i) over-indebted within the meaning of § 19 InsO or (ii) illiquid (*zahlungsunfähig*) within the meaning of § 17 InsO or (iii) an imminent illiquidity (*drohende Zahlungsunfähigkeit*) of the Issuer exists.

These payment conditions constitute a prohibition to pay in that any payments on the Bonds may only be made by the Issuer if it is made in accordance with the aforementioned conditions. Any payment made in breach of this prohibition must be returned to the Issuer irrespective of any agreement to the contrary.

- (5) Subject to § 3(1), the Issuer may satisfy its obligations under the Bonds also from other distributable assets (*sonstiges freies Vermögen*) of the Issuer.

§ 4 Interest

- (1) Fixed Interest Period.
- (a) In the period from and including the Interest Commencement Date to but excluding the First Reset Date the Bonds bear interest on their Principal Amount at the rate of 1.75 per cent. *per annum*. During such period, interest is scheduled to be paid in arrear on each Fixed Interest Payment Date and will be due and payable (*fällig*) in accordance with the conditions set out in § 4(3) and § 4(4).

In the period from and including the First Reset Date to but excluding the first Floating Interest Payment Date and thereafter from and including each Floating Interest Payment Date to but excluding the next Floating Interest Payment Date the Bonds bear interest on their Principal Amount at the Floating Interest Rate for the relevant Floating Interest Period. During such period, interest is scheduled to be paid quarterly in arrear on each Floating Interest Payment Date and will be due and payable (*fallig*) in accordance with the conditions set out in § 4(3) and § 4(4).

(b) Floating Interest Rate.

The rate of interest for the relevant Floating Interest Period (the "**Floating Interest Rate**") will be the relevant Reference Rate plus the Margin.

The Calculation Agent will determine the relevant Reference Rate in accordance with this § 4(2)(b) on each Interest Determination Date (as defined below).

The "**Reference Rate**" for each Floating Interest Period will be determined by the Calculation Agent and will be,

Falls an dem betreffenden Zinsfestsetzungstag nur eine oder keine der Referenzbanken der Berechnungsstelle die im vorstehenden Absatz beschriebenen Angebotssätze nennt, ist der Referenzbankensatz für die betreffende Variable Zinsperiode der Satz *per annum*, den die Berechnungsstelle als das arithmetische Mittel (falls erforderlich, auf- oder abgerundet auf das nächste tausendstel Prozent, wobei 0,0005 aufgerundet wird) der Sätze ermittelt, die von der Emittentin nach Treu und Glauben ausgewählte Großbanken im Interbankenmarkt der Euro-Zone um ca. 11:00 Uhr (Brüsseler Ortszeit) der Berechnungsstelle auf Anfrage der Emittentin als den jeweiligen Satz nennen, zu dem sie an dem betreffenden Zinsfestsetzungstag Darlehen in Euro für die betreffende Variable Zinsperiode und über einen Repräsentativen Betrag gegenüber führenden europäischen Banken anbieten.

If two or more of the Reference Banks provide the Calculation Agent with such offered quotations, the Reference Bank Rate for such Floating Interest Period shall be the arithmetic mean (rounded if necessary to the nearest one thousandth of a percentage point, with 0.0005 being rounded upwards) of such offered quotations, all as determined by the Calculation Agent.

If on the relevant Interest Determination Date only one or none of the selected Reference Banks provides the Calculation Agent with such offered quotations as provided in the preceding paragraph, the Reference Rate for the relevant Floating Interest Period shall be the rate *per annum* which the Calculation Agent determines as being the arithmetic mean (rounded if necessary to the nearest one thousandth of a percentage point, with 0.0005 being rounded upwards) of the rates, as communicated at approximately 11:00 a.m. (Brussels time) to the Calculation Agent at the request of the Issuer by major banks in the Euro-zone interbank market, selected by the Issuer acting in good faith, at which such banks offer, on the relevant Interest Determination Date, loans in Euro for the relevant Floating Interest Period and in a Representative Amount to leading European banks.

(d) Aufgaben der Berechnungsstelle.

Die Berechnungsstelle wird zu oder baldmöglichst nach jedem Zinsfestsetzungstag, den auf die Schuldverschreibungen zur Zahlung vorgesehenen Variablen Zinssatz bestimmen und den Zinsbetrag (der "**Variable Zinsbetrag**") für die entsprechende Variable Zinsperiode berechnen. Die Berechnungsstelle ermittelt den Variablen Zinsbetrag, indem sie den Variablen Zinssatz (einschließlich der Marge) und den Variablen Zinstagequotienten auf den Festgelegten Nennbetrag der Schuldverschreibungen anwendet, wobei sie den resultierenden Betrag auf den nächstliegenden Eurocent auf- oder abrundet (wobei 0,5 oder mehr eines Eurocents aufgerundet werden).

"**Floating Day Count Fraction**" means, in respect of the calculation of the Floating Interest Amount for any Calculation Period, the actual number of days in the Calculation Period divided by 360.

(d) Duties of the Calculation Agent.

The Calculation Agent will, on or as soon as practicable after each Interest Determination Date, determine the Floating Interest Rate and calculate the amount of interest (the "**Floating Interest Amount**") scheduled to be paid on the Bonds for the relevant Floating Interest Period. The Calculation Agent will calculate the Floating Interest Amount by applying the Floating Interest Rate (including the Margin) and the Floating Day Count Fraction to the Principal Amount of the Bonds and rounding the resultant figure to the nearest eurocent, with 0.5 or more of a eurocent being rounded upwards.

Die Berechnungsstelle wird veranlassen, dass der Variable Zinssatz, der Variable Zinsbetrag für die jeweilige Variable Zinsperiode, die jeweilige Variable Zinsperiode und der relevante Variable Zinszahlungstag der Emittentin, den Anleihegläubigern und, sofern dies von den jeweiligen Wertpapierbörsen, an denen die Schuldverschreibungen zu diesem Zeitpunkt auf Veranlassung der Emittentin notiert sind, vorgesehen ist, den jeweiligen Wertpapierbörsen durch Bekanntmachung gemäß § 11 baldmöglichst, aber keinesfalls später als zu Beginn der maßgeblichen nächstfolgenden Variablen Zinsperiode, bekannt gemacht wird. Im Fall einer Verlängerung oder Verkürzung der Variablen Zinsperiode kann der mitgeteilte Variable Zinsbetrag und Variable Zinszahlungstag ohne Vorankündigung nachträglich angepasst (oder andere geeignete Anpassungsregelungen getroffen) werden. Jede solche Anpassung wird umgehend allen Wertpapierbörsen, an denen die Schuldverschreibungen zu diesem Zeitpunkt auf Veranlassung der Emittentin notiert sind, sowie den Anleihegläubigern gemäß § 11 bekannt gemacht.

Alle Bescheinigungen, Mitteilungen, Gutachten, Festsetzungen, Berechnungen, Angebotssätze und Entscheidungen, die von der Berechnungsstelle für die Zwecke dieses § 4(2) gemacht, abgegeben, getroffen oder eingeholt werden, sind (sofern nicht ein offensichtlicher Irrtum vorliegt) für die Emittentin, die Zahlstellen und die Anleihegläubiger bindend.

(e) Benchmark-Ereignis.

Wenn ein Benchmark-Ereignis in Bezug auf den Ursprünglichen Benchmarksatz eintritt, gilt für die Bestimmung des betreffenden Referenzsatzes und die Verzinsung der Schuldverschreibungen gemäß § 4(2)(b) Folgendes:

- (i) Die Emittentin wird sich bemühen, sobald dies (nach Ansicht der Emittentin) nach Eintritt des Benchmark-Ereignisses und vor dem

The Calculation Agent will cause the Floating Interest Rate, each Floating Interest Amount for each Floating Interest Period, each Floating Interest Period and the relevant Floating Interest Payment Date to be notified to the Issuer, to the Bondholders and, if required by the rules of any stock exchange on which the Bonds are from time to time listed at the initiative of the Issuer, to such stock exchange by notice in accordance with § 11 as soon as possible after their determination, but in no event later than at the beginning of the next relevant Floating Interest Period thereafter. Each Floating Interest Amount and Floating Interest Payment Date so notified may subsequently be amended (or appropriate alternative arrangements may be made by way of adjustment) without notice in the event of an extension or shortening of the Floating Interest Period. Any such amendment will be promptly notified to any stock exchange on which the Bonds are then listed at the initiative of the Issuer and to the Bondholders in accordance with § 11.

All certificates, communications, opinions, determinations, calculations, quotations and decisions given, expressed, made or obtained for the purposes of the provisions of this § 4(2) by the Calculation Agent will (in the absence of manifest error) be binding on the Issuer, the Paying Agents and the Bondholders.

(e) Benchmark Event.

If a Benchmark Event occurs in relation to the Original Benchmark Rate, the relevant Reference Rate and the interest on the Bonds in accordance with § 4(2)(b) will be determined as follows:

- (i) The Issuer shall, as soon as this is (in the Issuer's view) required following the occurrence of the Benchmark Event and prior to the next Interest

nächsten Zinsfestsetzungstag erforderlich ist, einen Unabhängigen Berater zu benennen, der nach billigem Ermessen einen Neuen Benchmarksatz (wie in § 4(2)(e)(vi) definiert), die Anpassungsmarge (wie in § 4(2)(e)(vi) definiert) und etwaige Benchmark-Änderungen (wie in § 4(2)(e)(iv) definiert) festlegt.

- (ii) Wenn vor dem 10. Geschäftstag vor dem betreffenden Zinsfestsetzungstag
- (A) die Emittentin keinen Unabhängigen Berater ernannt hat; oder
- (B) der ernannte Unabhängige Berater keinen Neuen Benchmarksatz, keine Anpassungsmarge und/oder keine Benchmark-Änderungen (sofern erforderlich) gemäß diesem § 4(2)(e) festgelegt hat,

dann entspricht der Referenzsatz für die nächste Variable Zinsperiode dem an dem letzten zurückliegenden Zinsfestsetzungstag festgestellten Referenzsatz.

Falls dieser § 4(2)(e)(ii) bereits an dem Zinsfestsetzungstag vor Beginn der ersten Variablen Zinsperiode angewendet werden muss, entspricht der Referenzsatz für die erste Variable Zinsperiode *-0,208 % per annum*.

Falls der gemäß diesem § 4(2)(e)(ii) bestimmte Ausweichsatz (*Fallback*) zur Anwendung kommt, wird § 4(2)(e) erneut angewendet, um den Referenzsatz für die nächste nachfolgende (und, sofern notwendig, weitere nachfolgende)

- (ii) If, prior to the 10th Business Day prior to the relevant Interest Determination Date,
- (A) the Issuer has not appointed an Independent Adviser; or
- (B) the Independent Adviser appointed by it has not determined a New Benchmark Rate, has not determined the Adjustment Spread and/or has not determined the Benchmark Amendments (if required) in accordance with this § 4(2)(e),

then the Reference Rate applicable to the next Floating Interest Period shall be the Reference Rate determined on the last preceding Interest Determination Date.

If this § 4(2)(e)(ii) is to be applied on the first Interest Determination Date prior to the commencement of the first Floating Interest Period, the Reference Rate applicable to the first Floating Interest Period shall be *-0.208 % per annum*.

If the fallback rate determined in accordance with this § 4(2)(e)(ii) is to be applied, § 4(2)(e) will be operated again to determine the Reference Rate applicable to the next subsequent (and, if required, further subsequent) Floating Interest Period(s).

Variable Zinsperiode(n) zu bestimmen.

(iii) Falls der Unabhängige Berater nach billigem Ermessen feststellt,

(A) dass es einen Nachfolge-Benchmarksatz gibt, dann ist dieser Nachfolge-Benchmarksatz der Neue Benchmarksatz; oder

(B) dass es keinen Nachfolge-Benchmarksatz aber einen Alternativ-Benchmarksatz gibt, dann ist dieser Alternativ-Benchmarksatz der Neue Benchmarksatz.

In jedem dieser Fälle entspricht der "Referenzsatz" für die unmittelbar nachfolgende Variable Zinsperiode und alle folgenden Variablen Zinsperioden vorbehaltlich § 4(2)(e)(viii) dann (x) dem Neuen Benchmarksatz an dem betreffenden Zinsfestsetzungstag zuzüglich (y) der Anpassungsmarge.

(iv) Wenn ein Neuer Benchmarksatz und die entsprechende Anpassungsmarge gemäß diesem § 4(2)(e) festgelegt werden, und wenn der Unabhängige Berater nach billigem Ermessen feststellt, dass Änderungen hinsichtlich dieser Anleihebedingungen notwendig sind, um die ordnungsgemäße Anwendung des Neuen Benchmarksatzes und der entsprechenden Anpassungsmarge zu gewährleisten (diese Änderungen, die "**Benchmark-Änderungen**"), dann wird der Unabhängige Berater die Benchmark-Änderungen feststellen und die Emittentin wird diese durch eine Mitteilung gemäß § 4(2)(e)(v) bekanntmachen.

Diese Benchmark-Änderungen können insbesondere folgende

(iii) If the Independent Adviser determines in its reasonable discretion that:

(A) there is a Successor Benchmark Rate, then such Successor Benchmark Rate shall subsequently be the New Benchmark Rate; or

(B) there is no Successor Benchmark Rate but that there is an Alternative Benchmark Rate, then such Alternative Benchmark Rate shall subsequently be the New Benchmark Rate.

In each such case the "Reference Rate" for the immediately following Floating Interest Period and all following Floating Interest Periods, subject to § 4(2)(e)(viii), will then be (x) the New Benchmark Rate on the relevant Interest Determination Date plus (y) the Adjustment Spread.

(iv) If any relevant New Benchmark Rate and the applicable Adjustment Spread are determined in accordance with this § 4(2)(e), and if the Independent Adviser determines in its reasonable discretion that amendments to these Terms and Conditions are necessary to ensure the proper operation of such New Benchmark Rate and the applicable Adjustment Spread (such amendments, the "**Benchmark Amendments**"), then the Independent Adviser will determine the Benchmark Amendments and the Issuer will give notice thereof in accordance with § 4(2)(e)(v).

The Benchmark Amendments may include, without limitation, the

Eine Nichtzahlung aus diesem Grunde begründet keinen Verzug der Emittentin und keine anderweitige Verletzung ihrer Verpflichtungen aufgrund dieser Schuldverschreibungen oder für sonstige Zwecke. Die Emittentin wird die Anleihegläubiger gemäß § 11 über die Nichterfüllung der Nachzahlungsvoraussetzungen baldmöglichst nach ihrer Feststellung, spätestens am vierten Geschäftstag nach dem betreffenden Freiwilligen Nachzahlungstag bzw. The Issuer will give notice to the Bondholders regarding the non-fulfilment of the Conditions to Settlement in accordance with § 11 as soon as possible after its determination but in no event later than on the fourth Business Day following the relevant Optional Settlement Date or Mandatory Settlement Date.

Der Begriff "Schuldverschreibungen" umfasst im Fall einer solchen weiteren Begebung auch solche zusätzlich begebenen Schuldverschreibungen.

Eine Aufstockung dieser Emission gemäß diesem § 10 darf nicht durchgeführt werden, wenn diese Aufstockung zum Eintritt eines Aufsichtsrechtlichen Ereignisses führen würde, aufgrund dessen die Emittentin berechtigt wäre, die Schuldverschreibungen gemäß § 5(4) zurückzuzahlen.

Alternative Performance Measures

This Prospectus contains non-IFRS measures and ratios which are not required by, or presented in accordance with, IFRS or the accounting standards of any other jurisdiction. The non-IFRS measures may not be comparable to other similarly titled measures of other companies and should be considered together with the Hannover Re Group's IFRS results. Investors should rely on Hannover Re Group's IFRS results, supplemented by its non-IFRS measures, to evaluate the Group's performance. The Issuer also believes that non-IFRS measures and similar measures are widely used by certain

investors, securities analysts and other interested parties as supplemental measures of operating performance and financial standing.

Net investment income

Definition and use

The net investment income is a measure of the profitability of a company's investments. It is one of Hannover Re Group's key operational management indicators as the performance of the Group's investments – along with the underwriting result – is determinative for the Group's operating profit (EBIT). It is composed of the net income from assets under own management as well as the balance of interest income and expenses on funds withheld and contract deposits.

Limitations on usefulness

The net investment income is subject to fluctuations that are not attributable solely to the performance of the Hannover Re Group but are also influenced by factors such as changes in interest rates and exchange rates or changes in the consolidated group resulting from acquisitions and disposals.

Earnings before interest and taxes (EBIT)

Definition and use

The EBIT (operating profit) is the sum of the investment income, the underwriting result and the other income/expenses including amortisation of goodwill but excluding interest for other capital borrowed for financing purposes (financing costs) and before taxes (taxes on income). The EBIT is a measure of a company's profitability. Interest and taxes are excluded because they are external factors that do not reflect the underlying profitability of ongoing business operations. The EBIT thus highlights the profitability of the company attributable to its ongoing business operations.

Limitations on usefulness

The operating profit is subject to fluctuations that are not attributable solely to the performance of the Hannover Re Group but are also influenced by factors such as changes in interest rates and exchange rates or changes in the consolidated group resulting from acquisitions and disposals.

Group net income

Definition and use

Group net income is the consolidated result for the year / period (after financing costs and taxes) excluding non-controlling interests. It represents the amount remaining after deduction of all operating expenses, interest and taxes from the company's total revenue. It is an important measure that shows how successfully the company operated in a certain period. Group net income is therefore one of the Group's key operational management indicators.

Limitations on usefulness

The Group net income is subject to fluctuations that are not attributable solely to the performance of the Hannover Re Group but are also influenced by factors such as changes in interest rates and exchange rates or changes in the consolidated group resulting from acquisitions and disposals.

Policyholders' surplus

Definition and use

The policyholders' surplus is the sum of the shareholders' equity, non-controlling interests and hybrid capital. The policyholders' surplus provides information about the capital resources of a company.

Limitations on usefulness

Taken in isolation, the policyholders' surplus does not provide any information about the financial strength of a company and should be considered in conjunction with the risks from business operations. Furthermore, it includes elements that are influenced by changes in interest rates and exchange rates.

Combined ratio (Property and Casualty Reinsurance)

Definition and use

The combined ratio (Property and Casualty Reinsurance) is the sum of the "loss ratio" and the "expense ratio" including the net investment income from funds withheld and contract deposits.

The "loss ratio" represents the ratio of total claims and claims expenses incurred for own account to net premium earned. It enables conclusions to be drawn regarding how successfully underwriting risks are written.

The "expense ratio" is the ratio of acquisition and administrative expenses to net premium earned. It enables conclusions to be drawn regarding the efficiency of service performance.

In the segment property and casualty reinsurance the combined ratio is a key operational management ratio. It is used to draw conclusions about the profitability of the segment. A ratio below 100% means a positive underwriting result.

Limitations on usefulness

The combined ratio (Property and Casualty Reinsurance) is used to establish underwriting profitability, but it does not capture the profitability of the investment performance or the other income/expenses. Even in the event of a combined ratio (Property and Casualty Reinsurance) over 100%, the operating profit and/or the net income for the period / year can still be positive due to favourable investment income and/or positive other income/expenses.

Reconciliation

Combined ratio (Property and Casualty Reinsurance) =
(Claims and claims expenses
+ Commission and brokerage, change in deferred acquisition costs and other technical income / expenses
+ Administrative expenses
- Income / expense on funds withheld and contract deposits)
/ Net premium earned

<i>in EUR thousands, audited</i>	Financial Year 2019
Net premium earned	12,797,639
Income / expense on funds withheld and contract deposits	47,652
Claims and claims expenses	8,831,517
Commission and brokerage, change in deferred acquisition costs and other technical income/expenses	3,554,571
Administrative expenses	223,843
Combined ratio (Property and Casualty Reinsurance)⁽¹⁾	98.2%

(1) Including expenses on funds withheld and contract deposits.

Solvency ratio

Definition and use

Solvency II is a directive in European Union law stipulating solvency capital requirements for primary insurers and reinsurers in order to reduce the risk of their insolvency. Solvency II is essentially a risk-based capital regime. The Solvency ratio (capital adequacy ratio) represents the ratio of available economic capital to the required regulatory risk capital.

Limitations on usefulness

Taken in isolation, the Solvency ratio does not enable any conclusions to be drawn regarding the absolute amounts of required and available economic capital. The capitalisation required for regulatory purposes diverges from the internal target capitalisation because the confidence level used internally for management purposes is significantly higher than the confidence level required by Solvency II.

Recent Events

The SARS-CoV-2 virus was first discovered in December 2019 and identified as the cause of the disease COVID-19. This virus spread very quickly in the following months and led to the worldwide COVID-19 pandemic. The spread of the virus had a significant impact on public life and triggered considerable turbulence on the global financial markets from mid-February 2020 onwards.

To slow the rise in infections, governments around the world adopted dramatic measures ranging from simple social distancing to far-reaching regional or national barriers. To mitigate the economic downturn and disruption in financial markets that accompanied this, central banks and governments around the world - implemented fiscal and monetary policy measures to an unprecedented extent.

As discussed under "*COVID-19 risks and pandemic crisis in general*" in the section "*Risk Factors - Risks relating to the Issuer and the Hannover Re Group*", the pandemic may lead to an increase in financial, underwriting, liquidity and operational risks for the Hannover Re Group and may ultimately have a significant negative impact on the Hannover Re Group's results and its business and financial situation.

For the first quarter of the financial year 2020, Hannover Re established reserves of EUR 220 million for COVID-19-related losses. As a result, the amount of EUR 188 million budgeted for "major losses" for this period was exceeded by EUR 96 million. At the time of this Prospectus, it is not possible to assess whether this reserve, which is based on preliminary estimates, will correspond to the actual losses in the relevant period. As described above and in the section "*Risk Factors*" the need for future reserves and the actual occurrence of losses cannot be reliably estimated at the time of this Prospectus.

In view of the ongoing COVID-19 crisis and the associated increased uncertainty surrounding both the claims development and the capital market environment, the Management Board of Hannover Re Group has withdrawn its profit guidance on April 21st, 2020, for the current year.

According to preliminary estimates of Hannover Re, its Solvency ratio (see "*Alternative Performance Measures – Solvency ratio*" above) at the end of the first quarter of the financial year 2020 remained significantly above the limit of 180% and the threshold of 200% of Hannover Re Group.

Significant Changes

Except for the impact of the ongoing Covid-19 crises described under "*Recent Events*" above, there has been no significant change in the financial or trading position of the Issuer and Hannover Re Group since 31 March 2020.

Except for the impact of the ongoing Covid-19 crises described under "*Recent Events*" above, there has been no significant change in the financial performance of the Hannover Re Group since 31 March 2020.

Trend Information

There has been no material adverse change in the prospects of the Issuer since 31 December 2019.

TAXATION

The following is a general overview of certain tax considerations relating to the purchasing, holding and disposing of Bonds. It does not purport to be a complete analysis of all tax considerations relating to the Bonds. In particular, this discussion does not consider any specific facts or circumstances that may apply to a particular Bondholder. The discussions that follow for each jurisdiction are based upon the applicable laws in force and their interpretation on the date of this Prospectus. These tax laws and interpretations are subject to change that may occur after such date, even with retroactive effect.

The information contained in this section is limited to taxation issues and prospective investors should not apply any information set out below to other areas, including (but not limited to) the legality of transactions involving the Bonds.

Prospective Bondholders should consult their own tax advisers as to the particular tax consequences of subscribing, purchasing, holding and disposing the Bonds, including the application and effect of any federal, state or local taxes, under the tax laws of Germany, the Grand Duchy of Luxembourg and each country of which they are residents or citizens.

Germany

The following general overview does not consider all aspects of income taxation in Germany that may be relevant to a Bondholder of the Bonds in the light of the Bondholder's particular circumstances and income tax situation. This general overview is based on German tax laws and regulations, all as currently in effect and all subject to change at any time, possibly with retroactive effect.

German residents holding the Bonds as private assets

Taxation of income from the Bonds

If the Bonds are held as private assets (*Privatvermögen*) by an individual investor whose residence or habitual abode is in Germany, payments of interest under the Bonds are generally taxed as investment income (*Einkünfte aus Kapitalvermögen*) at a 25 per cent flat tax (*Abgeltungsteuer*) (plus a 5.5 per cent solidarity surcharge (*Solidaritätszuschlag*) thereon and, if applicable to the individual investor, church tax (*Kirchensteuer*)).

The same applies to capital gains from the sale or redemption of the Bonds. The capital gain is generally determined as the difference between the proceeds from the sale or redemption of the Bonds and the acquisition costs. Expenses directly and factually related (*unmittelbarer sachlicher Zusammenhang*) to the sale or redemption are taken into account in computing the taxable capital gain. Otherwise the deduction of related expenses for tax purposes is not permitted.

The coalition agreement between the German Christ Democratic Party, the German Christian Social Union and the German Social Democratic Party states that the flat tax regime might be (partially) reformed so that capital investment income of investors holding the Bonds as private assets may (partially) no longer be subject to the flat tax regime but taxed at individual progressive income tax rates of up to 45 per cent (plus a 5.5 per cent solidarity surcharge thereon and, if applicable to the individual investor, church tax).

According to the law for the reduction of the solidarity surcharge dated 10 December 2019 (*Gesetz zur Rückführung des Solidaritätszuschlags 1995*), as of the assessment period 2021 onwards the solidarity surcharge will only be levied for wage tax and income tax purposes, if the individual income tax of the holder exceeds the threshold of EUR 16,956 (EUR 33,912 for jointly assessed investors). The solidarity surcharge will remain in place for purposes of the withholding tax, the flat tax regime and the corporate income tax. In the case of a flat tax the income tax burden for an individual is lower than the flat tax of 25% and the holder applies for his/her capital investment income being assessed at his/her individual tariff-based income tax rate (see below) the solidarity surcharge would be refunded.

The flat tax is generally collected by way of withholding (see subsequent paragraph – *Withholding tax*) and the tax withheld shall generally satisfy the individual investor's tax liability with respect to the Bonds. If, however, no or not sufficient tax was withheld (*e.g.*, in case there is no Domestic Paying Agent as defined in the subsequent paragraph – *Withholding Tax*), the investor will have to include the income received with respect to the Bonds in its income tax return.

The flat tax will then be collected by way of tax assessment. The investor may also opt for inclusion of investment income in its income tax return if the aggregated amount of tax withheld on investment income during the year exceeded the investor's aggregated flat tax liability on investment income (e.g., because of available losses carried forward or foreign tax credits). If the investor's individual income tax rate on all taxable income including the investment income determined by generally applicable individual progressive tax rates is lower than 25 per cent, the investor may opt to be taxed at individual progressive tax rates with respect to its investment income; also in this case, the deduction of related expenses for tax purposes is not permitted.

Capital losses from the sale or redemption of the Bonds held as private assets should generally be tax-recognised irrespective of the holding period of the Bonds. According to the view of German tax authorities a bad debt loss (*Forderungsausfall*) and a waiver of a receivable (*Forderungsverzicht*) (to the extent the waiver does not qualify as a hidden contribution) shall, in general, not be treated as a sale, so that losses suffered upon such bad debt loss or waiver shall not be deductible for tax purposes. With respect to a bad debt loss the German Federal Tax Court has decided in 2017 that a final bad debt loss with respect to a capital claim shall be deductible for tax purposes; the question whether this also applies to a waiver of a receivable has been left open by the court. With respect to a (voluntary) waiver of receivable a lower German fiscal court confirmed the view of German tax authorities in a final decision and another lower fiscal court rejected the jurisdiction of the German Federal Fiscal Court with respect to the tax deductibility of a bad debt loss. The German Federal Fiscal Court, however, recently held, that also capital losses from a voluntary waiver of a receivable shall be recognized for purposes of the flat tax regime.

While the German tax authorities previously took the position that a disposal (and, as a consequence, a tax loss resulting from such disposal) shall not be recognized if the Bonds are sold at a market price, which is lower than the transaction costs or if the level of transaction costs is restricted because of a mutual agreement that the transaction costs are calculated by subtracting a certain amount from the sales price, the German tax authorities have concluded in an amendment from 10 May 2019 to the tax decree issued by the German Federal Ministry of Finance dated 18 January 2016 following a recent ruling of the German Federal Fiscal Court that the recognition as disposal shall not depend on the amount of any consideration or the amount of the transaction costs.

While the German tax authorities previously took the position that capital losses shall not be recognised by the German tax authorities if no (or only de minimis) payments are made to the individual investors on the maturity or redemption date of the Bonds, the German Federal Fiscal Court has published a decision to the contrary with regard to losses incurred in connection with knock-out certificates. In this decision the German Federal Fiscal Court took the view that exceeding the knock-out threshold (i.e. no payments on the day of exceeding the knock-out threshold) shall be treated similar to a bad debt loss as a sale at the value zero, so that losses suffered shall also be deductible for tax purposes. According to the amendment to the tax decree issued by the German Federal Ministry of Finance dated 18 January 2016 recently published on 16 September 2019, the German Federal Ministry of Finance now also applies the principles of the ruling of the German Federal Fiscal Court.

As of January 1, 2020, capital losses of non-business investors in the scenarios described above can now be set-off against income derived from capital investments up to an amount of EUR 10,000 per annum. Losses exceeding that threshold can be carried forward and set-off against income derived from capital investments up to an amount of EUR 10,000 per annum. in subsequent years, subject to certain requirements.

Any tax-recognised capital losses may not be used to offset other income like employment or business income but may only be offset against investment income. Capital losses not utilised in one annual assessment period may be carried forward into subsequent assessment periods but may not be carried back into preceding assessment periods. Individual investors are entitled to a saver's lump sum tax allowance (*Sparer-Pauschbetrag*) for investment income of €801 per year (€1,602 for jointly assessed investors). The saver's lump sum tax allowance is considered for purposes of the withholding tax (see subsequent paragraph – *Withholding tax*) if the investor has filed a withholding tax exemption request (*Freistellungsauftrag*) with the respective Domestic Paying Agent (as defined below). The deduction of related expenses for tax purposes is not possible.

Withholding tax

If the Bonds are kept or administered in a domestic securities deposit account by a German credit or financial services institution (*Kredit- oder Finanzdienstleistungsinstitut*) (or by a German branch of a foreign credit or financial services institution), or by a German securities trading business (*Wertpapierhandelsunternehmen*) or a German securities trading bank (*Wertpapierhandelsbank*) (each a "**Domestic Paying Agent**") which pays or credits the interest, a 25 per cent withholding tax, plus a 5.5 per cent solidarity surcharge thereon, resulting in a total withholding tax charge of 26.375 per cent, is levied on the interest payments. The applicable withholding tax rate is in excess of the aforementioned rate if church tax applies and is collected for the individual investor by way of withholding which is provided for as a standard procedure unless the Bondholder of the Bonds has filed a blocking notice (*Sperrvermerk*) with the German Federal Central Tax Office (*Bundeszentralamt für Steuern*).

Capital gains from the sale (including the redemption) of the Bonds are also subject to the 25 per cent withholding tax, plus a 5.5 per cent solidarity surcharge thereon, if the Bonds are kept or administered by a Domestic Paying Agent effecting the sale or redemption from the time of their acquisition. If interest claims are disposed of separately (i.e. without the Bonds), the proceeds from the disposition are subject to withholding tax. The same applies to proceeds from the payment of interest claims if the Bonds have been disposed of separately. If the Bonds were sold or redeemed after being transferred to a securities deposit account with a Domestic Paying Agent, 25 per cent withholding tax (plus solidarity surcharge thereon) would be levied on 30 per cent of the proceeds from the sale or the redemption, as the case may be, unless the investor or the previous depository bank was able and allowed to prove evidence for the investor's actual acquisition costs to the Domestic Paying Agent. The applicable withholding tax rate is in excess of the aforementioned rate if church tax applies and is collected for the individual investor by way of withholding which is provided for as a standard procedure unless the Bondholder of the Bonds has filed a blocking notice (*Sperrvermerk*) with the German Federal Central Tax Office (*Bundeszentralamt für Steuern*).

German resident investors holding the Bonds as business assets

Taxation of income from the Bonds

If the Bonds are held as business assets (*Betriebsvermögen*) by an individual or corporate investor which is tax resident in Germany (i.e., a corporation with its statutory seat or place of management in Germany), interest income and capital gains from the Bonds are subject to personal income tax at individual progressive rates or corporate income tax (plus a 5.5 per cent solidarity surcharge thereon and church tax, if applicable) and, in general, trade tax. The effective trade tax rate depends on the applicable trade tax factor (*Gewerbesteuer-Hebesatz*) of the relevant municipality where the business is located. In case of individual investors the trade tax may, however, be partially or fully creditable against the investor's personal income tax liability depending on the applicable trade tax factor and the investor's particular circumstances. Losses from the disposal or redemption of the Bonds will generally be tax-recognized and may generally be offset against other income subject to certain limitations.

Withholding tax

If the Bonds are kept or administered by a Domestic Paying Agent which pays or credits the interest, a 25 per cent withholding tax, plus a 5.5 per cent solidarity surcharge thereon, resulting in a total withholding tax charge of 26.375 per cent, is generally levied on the interest payments. The applicable withholding tax rate is in excess of the aforementioned rate if church tax applies and is collected for the individual investor by way of withholding which is provided for as a standard procedure unless the Bondholder of the Bonds has filed a blocking notice (*Sperrvermerk*) with the German Federal Central Tax Office (*Bundeszentralamt für Steuern*).

No withholding is generally required on capital gains from the disposal or redemption of the Bonds which is derived by German resident corporate investors and, upon application, by individual investors holding the Bonds as assets of a German business, subject to certain requirements.

Any capital losses incurred from the disposal or redemption of the Bonds will not be taken into account for withholding tax purposes. If withholding tax is levied, the withholding tax does not satisfy the investor's personal or corporate income

tax liability with respect to the Bonds. The income from the Bonds will have to be included in the investor's personal or corporate income tax return. Any German withholding tax (including surcharges) is generally fully creditable against the investor's personal or corporate income tax liability or refundable, as the case may be.

Non-German resident Bondholders

Income derived from the Bonds by Bondholders who are not tax resident in Germany is in general not subject to German income taxation, and no withholding tax shall be withheld, unless (i) the Bonds are held as business assets of a German permanent establishment of the investor or by a permanent German representative of the investor or (ii) the income derived from the Bonds does otherwise constitute German source income.

If the income derived from the Bonds is subject to German taxation according to (i) to (ii) above, the income is subject to German income taxation and withholding tax similar to that described above for German resident Bondholders. Under certain circumstances, foreign investors may benefit from tax reductions or tax exemptions under applicable double tax treaties (*Doppelbesteuerungsabkommen*) entered into with Germany.

Substitution of the Issuer

If the Issuer exercises the right to substitute the debtor of the Bonds, the substitution might, for German tax purposes, be treated as a redemption of the Bonds in exchange for new bonds issued by the New Issuer and subject to similar taxation rules like the Bonds. In particular, such a substitution could result in the recognition of a taxable gain or loss for any investor of a Bond.

Inheritance and gift tax

The transfer of Bonds to another person by way of gift or inheritance is subject to German gift or inheritance tax, respectively, if *inter alia*

- (i) the testator, the donor, the heir, the donee or any other acquirer had his residence, habitual abode or, in case of a corporation, association of persons (*Personenvereinigung*) or asset pool (*Vermögensmasse*), has its seat or place of management in Germany at the time of the transfer of property,
- (ii) except as provided under (i), the testator's or donor's Bonds belong to a business asset attributable to a permanent establishment or a permanent representative in Germany.

Special regulations apply to certain German expatriates.

Prospective investors are urged to consult with their tax advisor to determine the particular inheritance or gift tax consequences in light of their particular circumstances.

Other taxes

The purchase, sale or other disposal of Bonds does not give rise to capital transfer tax, value added tax, stamp duties or similar taxes or charges in Germany. However, under certain circumstances entrepreneurs may choose liability to value added tax with regard to the sale of Bonds which would otherwise be tax exempt. Net wealth tax (*Vermögensteuer*) is, at present, not levied in Germany.

SUBSCRIPTION AND SALE OF THE BONDS

General

Pursuant to a subscription agreement dated 2 July 2020 (the "**Subscription Agreement**") among the Issuer and the Joint Lead Managers, the Issuer has agreed to sell to the Joint Lead Managers, and the Joint Lead Managers have agreed, subject to certain customary closing conditions, to purchase, the Bonds on 8 July 2020. The Issuer has furthermore agreed to pay certain fees to the Joint Lead Managers and to reimburse the Joint Lead Managers for certain expenses incurred in connection with the issue of the Bonds.

The Subscription Agreement provides that the Joint Lead Managers under certain circumstances will be entitled to terminate the Subscription Agreement. In such event, no Bonds will be delivered to investors. Furthermore, the Issuer has agreed to indemnify the Joint Lead Managers against certain liabilities in connection with the offer and sale of the Bonds.

Certain of the Joint Lead Managers and their respective affiliates may be customers of, borrowers from or creditors of Hannover Re and its affiliates. In addition, certain Joint Lead Managers and their respective affiliates have engaged, and may in the future engage, in investment banking and/or commercial banking transactions with, and may perform services for, Hannover Re and its affiliates in the ordinary course of business. In particular, in the ordinary course of their business activities, the Joint Lead Managers and their respective affiliates may make or hold a broad array of investments and actively trade debt and equity securities (or related derivative securities) and financial instruments (including bank loans) for their own account and for the accounts of their customers. Such investments and securities activities may involve securities and/or instruments of Hannover Re or its affiliates. Certain of the Joint Lead Managers or their respective affiliates that have a lending relationship with Hannover Re routinely hedge their credit exposure to Hannover Re consistent with their customary risk management policies. Typically, such Joint Lead Managers and their respective affiliates would hedge such exposure by entering into transactions which consist of either the purchase of credit default swaps or the creation of short positions in securities, including potentially the Bonds issued. Any such positions could adversely affect future trading prices of the Bonds. The Joint Lead Managers and their respective affiliates may also make investment recommendations and/or publish or express independent research views in respect of such securities or financial instruments and may hold, or recommend to clients that they acquire, long and/or short positions in such securities and instruments.

There are no interests of natural and legal persons involved in the issue, including conflicting ones, that are material to the issue.

Third Party Information: With respect to any information included herein and specified to be sourced from a third party (i) the Issuer confirms that any such information has been accurately reproduced and as far as the Issuer is aware and is able to ascertain from information available to it from such third party, no facts have been omitted the omission of which would render the reproduced information inaccurate or misleading and (ii) neither the Issuer nor any Manager has independently verified any such information and neither the Issuer nor any Manager accepts any responsibility for the accuracy thereof.

Yield: For the investors, the yield of the Bonds until the First Reset Date is 1.829 per cent *per annum*, calculated on the basis of the Issue Price. Such yield is calculated in accordance with the ICMA (International Capital Markets Association) Method. The ICMA method determines the effective interest rate on bonds by taking into account accrued interest on a daily basis.

The yield of the Bonds for the period after the First Reset Date cannot be determined as of the date of this Prospectus.

Ratings: The Bonds are expected to be rated "A" by S&P.⁶

S&P is established in the European Community and are registered under Regulation (EC) No 1060/2009 of the European Parliament and of the Council of 16 September 2009 on credit rating agencies, as amended (the "**CRA Regulation**")⁷.

Investors in the Bonds should be aware that a credit rating is not a recommendation to buy, sell or hold securities and may be revised or withdrawn by the rating agency at any time.

Legal Entity Identifier: The LEI of Hannover Re is 529900KIN5BE45V5KB18.

⁶ S&P defines "A" as follows: An obligation rated "A" is somewhat more susceptible to the adverse effects of changes in circumstances and economic conditions than obligations in higher-rated categories. However, the obligor's capacity to meet its financial commitments on the obligation is still strong. Ratings from "AA" to "CCC" may be modified by the addition of a plus (+) or minus (-) sign to show relative standing within the rating categories.

⁷ The European Securities and Markets Authority publishes on its website (<https://www.esma.europa.eu/supervision/credit-rating-agencies/risk>) a list of credit rating agencies registered in accordance with the CRA Regulation. That list is updated within five working days following the adoption of a decision under Article 16, 17 or 20 CRA Regulation. The European Commission shall publish that updated list in the Official Journal of the European Union within 30 days following such update.
